

## MERTECH MARINE - PROJECTS AND CABLES

System Name	Location	Acquired by **	Recovered	"Distance Recovered and Recycled (km) *"	Status
SAT-1	South Atlantic	Mertech Marine (Oct. 2007)	Orange, Lida Shipping	8 350	Completed
SAT-2	South Atlantic	Mertech Marine (Apr. 2013)	A-/Lida Shipping	7 350	Completed
CANTAT-3	South Atlantic	Mertech Marine (Jul. 2012)	A-/Lida Shipping	1 850	In progress
BRACAN	North Atlantic	Mertech Marine (Oct. 2014)	Lida Shipping	2 700	In progress
UK Spain 1, 2, 3	Biscay	Mertech Marine (20xx)	Future Project		Future project
CANTAT-1	North Atlantic	Mertech Marine (20xx)	Future Project		Future project
CANTAT-2	North Atlantic	Mertech Marine (20xx)	Future Project		Future project
ICECAN	North Atlantic	Mertech Marine (Jun. 2013)	Future Project		Future project
SCOTICE	North Atlantic	Mertech Marine (Jun. 2013)	Future Project		Future project
Various other systems	Mediterranean	Mertech Marine (Oct. 2014)	Future Project		Future project
Various other systems	Pacific	Mertech Marine (Mar. 2014)	Future Project		Future project
Various other systems	Mid-Atlantic and Caribbean	Mertech Marine (Jan. 2016)	Future Project		Future project
				20 250	

\* - From 2009 till 2013 two contractors namely Lida- and Alida Shipping were used for marine activities. In 2014, Mertech Marine acquired the mv Lida, (Lida Shipping), which is currently our main cable recovery operation.

- All the recovered cables were recycled in our own processing plant in Cape Town, South Africa using our custom-built dismantling machines.

- Repeaters are "cleaned" and recycled by the Nuclear Energy Corporation of South Africa ("NECSA") and Mertech Marine has all the required permits to handle, convey, store and process repeaters containing hazardous materials in South Africa.

\*\* - All cables were acquired from the original owners and consortium members by Mertech Marine.
